## New FIM CCR (Homologated) Paints

Dear Sir or Madam,

Further to the tests carried out recently at the GFC Chimica (Ferrara), a new paint, from GREENFORD, has been successfully tested and homologated by the FIM-CCR.

The 2022 FIM Standards for Circuits will therefore be amended as follows:

### 4.11.1 FIM homologated paints

*The paint to be used for the white lines and the kerbs along the track, for the starting grid and for any other marking on the track, in the pit-lane and on the asphalt run-off areas must be homologated by the CCR/FIM.*

*For the Sidecar class, the use of the CCR/FIM homologated paint is recommended.*

*The CCR/FIM homologated paints are the following:*

<del>COLORIFICIO SAMMARINESE</del>	<del>Samoline Antiskid paint (8550.0500)</del>
<del>COLORIFICIO SAMMARINESE</del>	<del>Samoline Starting Grid (white or black)</del>
<del>DREW PAINTS, INC.</del>	<del>09NS-Series W/B Circuit Marking Paint</del>
<b>GREENFORD</b>	<b>Anti-slip</b>
ORÉ PEINTURE	Race Line
SWARCO LIMBOROUTE	Circuitline WBP

*(see the manufacturers' contact details in the appendices)*

*Circuits shall keep at the disposal of the Safety Officer, the FIM Inspector or the Jury President, the paint order forms and invoices, so that it can be proved at any time that the paints used are the FIM homologated ones.*

*The paint application method defined by the manufacturer shall be scrupulously followed.*

*The homologation procedure can be obtained from the CCR/FIM Administration.*

FÉDÉRATION INTERNATIONALE  
DE MOTOCYCLISME

The technical datas and the results of the tests carried out for these FIM homologated paints remain at your disposal.

With best regards,

Paul DUPARC  
CCR SPORTING MANAGER
