## **New FIM CCR (Homologated) Light Panel**

Dear Sir or Madam,

Further to the tests carried out recently at the METAS Laboratory (Bern), a new system of Light & led Panels or a grade 3 has been successfully tested and homologated by the FIM.

The 2022 FIM Standards for Circuits will therefore be amended as follows:

### **11.1.5 LIGHT & LED PANELS**

*Light panels could be used in addition to the flag presentation with the prior approval of the Safety Officers. The colours of the panels used will remain at the discretion of the Safety Officers. In any case, when applied, the red light can only be operated from the Race Control.*

*A joint FIA-FIM Homologation program has being developed.  
The homologation protocol can be obtained from the FIM administration.  
For 2022, the use of homologated light panels will be mandatory for GP disciplines.  
For 2023, the use of homologated light panels will be mandatory for SBK and EWC disciplines.*

*The following Light Panels devices are used by the CCR/FIM (see manufacturers' and/or distributors' details in Appendix).*

**Grade 1**  
**EM MOTORSPORT - T1**  
**PIXELCOM (PIXELMOTORSPORT) - 768-G1**

**Grade 2**  
**DZ ENGINEERING - DZeF-02**  
**EM MOTORSPORT - T2**  
**PIXELCOM (PIXELMOTORSPORT) - 768-G2**

FÉDÉRATION INTERNATIONALE  
DE MOTOCYCLISME

**Grade 3**  
**EM MOTORSPORT – T3**

The results of the tests carried out for these new light panels are available on demand to the FIM Administration.

We remain at your disposal for any additional information you may require.  
With best regards,

**Paul DUPARC**  
**CCR SPORTING MANAGER**
