New FIM CCR Homologated Paint “*Mapecoat TNS Race Track*”

Dear Sir or Madam,

Further to the tests carried out recently at the GFC Chimica (Ferrara), a new paint «***Mapecoat TNS Race Track***», from Mapei SpA, has been successfully tested and homologated by the FIM-CCR.

The 2022 FIM Standards for Circuits will therefore be amended as follows:

4.11.1 FIM homologated paints

The paint to be used for the white lines and the kerbs along the track, for the starting grid and for any other marking on the track, in the pit- lane and on the asphalt run-off areas must be homologated by the CCR/FIM.

For the Sidecar class, the use of the CCR/FIM homologated paint is recommended.

The CCR/FIM homologated paints are the following:

COLORIFICIO SAMMARINESE

DREW PAINTS, INC.

GREENFORD

GEVEKO (ex ORÉ PEINTURE)

MAPEI

SWARCO LIMBORROUTE

Samoline Antiskid paint (8550.0500)

09NS-Series W/B Circuit Marking Paint

Anti-slip

Race Line

Mapecoat TNS Race Track

Circuit line WBP

(see the manufacturers' contact details in the appendices)

Circuits shall keep at the disposal of the Safety Officer, the FIM Inspector or the Jury President, the paint order forms and invoices, so that it can be proved at any time that the paints used are the FIM homologated ones.

The paint application method defined by the manufacturer shall be scrupulously followed.

The homologation procedure can be obtained from the CCR/FIM Administration.

FÉDÉRATION INTERNATIONALE
DE MOTOCYCLISME

The technical datas and the results of the tests carried out for these FIM homologated paints remain at your disposal.

With best regards,

Paul DUPARC
CCR SPORTING MANAGER
