

INFORMATION ON HELMET CERTIFICATION

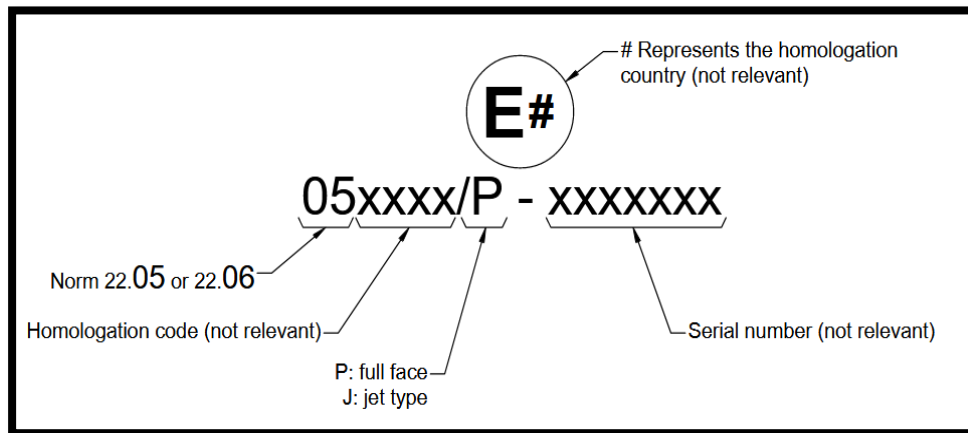

Dear Rider / Participant,

the FIM Technical Commission (CTI) and the FIM Trial Commission (CTR), in their ongoing efforts to raise racing safety standards, announce that, starting from the 01.01.2026, helmets with the ECE 22.05 homologation will not be allowed anymore.

The rules announcing this change have already been published at the following link:

https://www.fim-moto.com/en/documents?tx_solr%5Bq%5D=trial+technical

A simple way to understand the ECE approval labels is included in this regulation.

NB: as you can see here above, if you use an ECE certified helmet, from the 01.01.2026, the two first digits must show: **06** (instead of 05, which will therefore be refused and retained at the technical bay until the end of the official event).
